

Slocum Piloting

Piloting documentation for the Slocum glider platform.

In This Section

Slocum Piloting Checklist

Daily pilot log – the values and checks a pilot records each piloting day.

[Slocum Piloting Checklist](#)

Power Saving

Running missions on the lowest power and keeping the glider alive until recovery – diving and drifting, on the surface and below it.

[Power Saving](#)

Passive Acoustic Monitoring

Running PAM missions: acoustic payloads (DMON, WISPR, VMT), integration, and flying the glider quietly to minimize self-noise.
