

Slocum Piloting Checklist

A daily pilot log. Work down the list each piloting day, recording the value from the indicated source and flagging anything outside its normal range.

Pilot: _____ Glider S/N: _____ Date (UTC): _____

First piloting day of a deployment

Confirm **Science** and **Navigation** against the campaign plan, and create a new *important* log entry with a fresh campaign summary for reference.

Status & Identity

Source: glider dialog unless noted.

☐ **Date**

☐ **Last surface reason**

☐ **Current mission**

☐ **Mission time** *paste the seconds timestamp; glider aborts for overtime every 45 days***

☐ **GPS location**

☐ **Next surfacing is in** *estimated from glider history*

Navigation

☐ **Performance of navigation last leg** *are we headed to the desired waypoint?*

☐ **Navigation to / why** *which waypoint are we going to, and potentially why*
