

Slocum Altimeter One-Pager

Hardware

Spec	Value
Frequency	170 kHz
TVR	156 dB
Max SPL	204.3 dB
Beam pattern (–3 dB)	18°
Operating interval	Every 4 seconds (downcast only)

Handling

Protect the nose.

The altimeter is sensitive even when potted in urethane. Avoid putting pressure on the glider nose – altimeters can be damaged if the glider is dragged or dropped on a lab floor or boat deck during ballasting or deployment.

Installation

Connector lubrication

When mating the altimeter to the glider nose, spray both male and female connectors with **3M silicone spray** (3M I.D. 62-8703-1398-7).
