

Seaglider Mission Planning Checklist

Mission name: _____ **Seaglider ID:** _____

Operations manager: _____ **Client:** _____

Source

Paraphrased from community Seaglider mission-planning checklists. See the [Mission Planning guides](#) for platform-independent planning detail.

Mission definition

- ☐ Project description and mission objectives written down
- ☐ Special operational considerations noted
- ☐ Timeline agreed: earliest deployment, latest recovery
- ☐ Operational risk assessment completed and summarized
- ☐ Major show-stoppers assessed, with a plan B for each
- ☐ Permits identified and obtained (*if any*)

Environment

- ☐ Expected currents in the operating area characterized *can the glider stem them?*
(~40 cm/s depth-averaged is the practical limit)
- ☐ Depth range of the area mapped; bathymetry maps prepared if needed
- ☐ Density/stratification range checked against the available VBD budget
- ☐ Ice climatology / ice maps reviewed (*high-latitude missions*)
