

Seaglider Recovery Checklist

Mission: _____ **Seaglider ID:** _____

Field team: _____ **Pilot:** _____ **Date:** _____

Source

Paraphrased from community Seaglider recovery checklists. Adapt to your vessel and local procedures.

1. Before the boat leaves

- ☐ Pilot: choose the recovery location and fly the glider toward it in advance
- ☐ Field team: notify pilot on departure with ETA on site
- ☐ Pilot: switch to **shallow dives** approaching the rendezvous
- ☐ Pilot: time the **\$QUIT** so the glider surfaces just before the boat arrives
minimize drift time on the surface
- ☐ Pilot: confirm glider is in recovery mode and staying on the surface
- ☐ Pilot: relay latest GPS fixes to the field team continuously

2. On site

- ☐ Field team: inform pilot on arrival; search the surface
- ☐ Position the boat alongside with the current pushing the boat **away from** the glider
never drift onto it

Small boat (cradle):

- ☐ Take control of the glider by the antenna mast
