

Slocum Glider Deployment Procedure

For vessel operators and external deployment partners

This document is intended to be shared with ship crews, vessel operators, and any external personnel assisting with the deployment of a Slocum G3 glider. It covers pre-deployment setup and launch by crane or from a MOB-boat.

Do not power on or deploy the glider without explicit clearance from the glider operations team. Contact details are in the [Operator Contacts](#) section below.

Source

Paraphrased from NorGliders / University of Bergen (UiB) field procedure notes (*SL13 – User Notes – G3 Deployment Field*), including photos from that procedure. Specifications below are typical for a **G3 with energy bay** – confirm against your specific glider and payload configuration.
