

Seaglider Piloting

Piloting documentation for the Seaglider platform.

In This Section

Seaglider Piloting Checklist

Daily pilot checks — glider status, health parameters, trim, sensors, navigation, and endurance tracking.

Dive Cycle & Control Files

How a Seaglider flies its mission and how the pilot steers it: the canonical dive and its run phases, the G&C loop, the four control files (`cmdfile` , `targets` , `science` , `pdocmds.bat`), the `$GO` / `$RESUME` / `$QUIT` directives, and deck dives.
